PRODUCED UNDER PHARMACEUTICAL GMP REGULATIONS

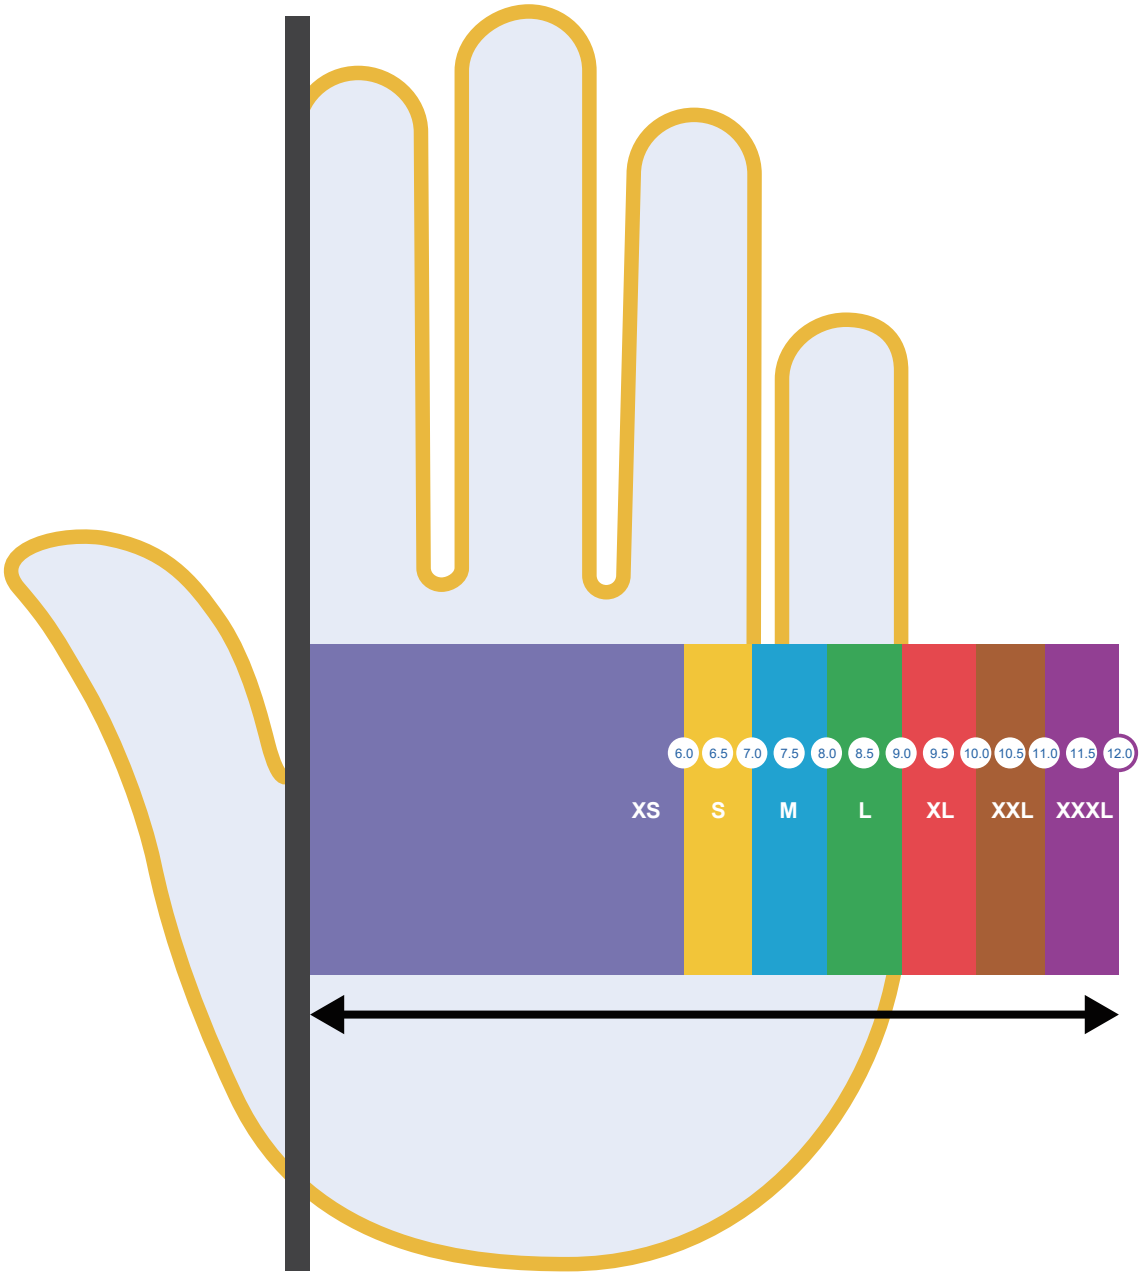
FIND THE RIGHT GLOVE SIZE

Glove Size Chart

Your glove size is determined by the width of your hand, this chart is a guide only and should be used to determine your approximate glove size.

Instructions

1. Place your right hand, palm face down, onto the hand outline with your fingers together and your thumb open away from your hand
2. Make sure the edge of your index finger is aligned to the black line
3. The colored section where the right hand edge of your hand stops is your glove size



82-133

NITRILE GLOVES

CE 0493

- Manufactured with a thinner nitrile formulation that increases comfort and improves flexibility without compromising protection
- Offers textured fingertips to provide an improved grip for a variety of applications

Industries

- Food Processing
- Automotive
- Life Sciences

Recommended for

- Catering
- Food processing and handling
- Inspection of parts, equipment
- Assembly and inspection of components
- Equipment repair and maintenance
- Picking and fastening components
- Adjusting parts and systems
- Handling of paint/glue guns and sprayers
- Transferring liquids and solids Sample taking and processing

OANIS

International Business Services

Our Mission

OANIS Protect works with trusted manufacturers and suppliers to provide PPE, hygiene and testing solutions to organisations and governments to provide protection to human beings from Covid-19 and wider infectious diseases.

Introduction

OANIS Protect is a newly formed company that brings together professionals with significant business, medical, trading and marketing experience to try and help the private and public health sectors better access the global supply of Personal Protection Equipment and Medical Equipment. Covid-19 has created a vacuum in the supply chain which has further exacerbated the issue of timely supply of safe, certified equipment from established and tested producers and distributors.

OANIS Protect is born with the sole purpose of trying to create certainty and stability in fragmented and disrupted supply and distribution chains.

Opportunity Identified

At OANIS, we believe that through transparency, supportiveness and simplicity, we can do our part to support the health system. Through access to established producers all over the world, from 3M in the US, to established and tested Asian and European manufacturers, OANIS can bring the certainty and safety of timely deliveries.

All this at competitive, transparent and fair prices.
